

Press Release March 14, 2013

JLT Mobile Computers and ID Work Showcase New Rugged Computers at SITL in Paris March 26-28

JLT Mobile Computers, developer of reliable computers for demanding environments, and ID Work, newly signed local JLT sales partner, will showcase at SITL the new VERSO Series, industry's highest performance rugged computer, together with an extensive product portfolio for the transport, logistics and heavy-duty markets.

JLT Mobile Computers will participate together with its newly signed value added reseller ID Work. ID Work is recently founded by Philippe BRIANTAIS, also founder of A3dis and recently one of the owners of Nomadvance.

“We are pleased to present our portfolio of products, not least the new VERSO series that offers unmatched performance and features for the transport, logistics and heavy-duty market,” said Per Holmberg, CEO of JLT Mobile Computers. “We are equally excited to kick off the partnership with ID Work and we’re looking forward to some exiting days in Paris.”

The SITL exhibition is one of the most important European meeting places for transport and logistics. The Exhibition combines four shows in one location; SITL Logistics Solutions, Eco Transport & Logistics, RFID, and Intralogistics. When materials handling, transport and logistics come together new requirements and solutions emerge. This is the place to see it all.

Meet JLT Mobile Computers and ID Work at Villepinte (Hall 4, Stand T092).
