## **JLT Mobile Computers Doubles the Memory of the Rugged VERSO Computers, Reinforces Position as Performance Leader**

**JLT Mobile Computers, developer of mobile computers for tough environments, has doubled the internal memory of its fixed-mount VERSO computers. The VERSO computers combine leading-edge performance with the highest reliability. Equipped with the Intel Core i7 processor, and now 8-gigabyte DDR3 internal memory, the computers deliver unmatched performance. The VERSO computers fulfill customer demand for performance, ruggedness and reliability that characterizes industries such as mining, construction, off-shore, ports, and agriculture.**

Customers use the VERSO computers today for demanding applications such as real-time data processing, positioning calculations, and video streaming. With twice the internal memory, these applications are handled even more efficiently. Moreover, the user experience is greatly improved, especially when the computer is used with Windows Embedded 8 Standard or Windows 7 operating systems.

“With the VERSO series, the highest performance rugged vehicle computers in the market, we meet the tough customer requirements within the growing heavy-duty segment,” said Per Holmberg, CEO at JLT. “This upgrade reinforces our lead position within this demanding segment.”

The VERSO computers are resistant to dust and water, can be used in both extremely cold and extremely hot temperatures and handle power interruptions without stoppages. The VERSO computers are available today from JLT resellers around the world.
