Press Release 14/2016

**JLT Mobile Computers Named to Food Logistics' 2016 List of
Top Software and Technology Providers**

Highest reliability and computing performance combined with virtually unbreakable screens designed to meet the hygienic standards of food logistics environments secure JLT a spot on the FL100+ list for the second year running

Växjö, Sweden, 21st December 2016 * * * [JLT Mobile Computers](http://www.jltmobile.com), a leading developer and manufacturer of reliable computers for demanding environments, has been named by Food Logistics to its 2016 FL100+ Top Software and Technology Providers list for the second consecutive year.

As the only publication exclusively dedicated to covering the movement of products throughout the global food supply chain, Food Logistics put together an annual list of the top 100+ software and technology providers, whose products are crucial to the global food industry. The list serves as a resource guide of companies offering products and services that improve productivity and enhance efficiency in the food production industry.

“The software and technology sector continues to generate new and exciting opportunities for growers, food manufacturers, grocery retailers and the many logistics providers that support them,” notes Lara L. Sowinski, editorial director at Food Logistics. “Today’s cloud-based solutions and mobile connectivity are helping create tools that are more flexible, affordable and responsive, making software and technology even more valuable to those in the global food supply chain.”

Designed from the ground up to withstand the most challenging environments, the logistics computers from JLT Mobile Computers are the most rugged, reliable, high-performance PCs on the market. Support of the latest mobile connectivity solutions, a wide range of operating temperatures and the rugged PowerTouch™ screens that offer the functionality and responsiveness of consumer tablets, combined with the ability to operate in cold and wet conditions, with or without gloves, make the computers from JLT a perfect fit for use in the food and beverage industry. By securing uninterrupted information access and keeping downtime to a minimum, JLT rugged computers give the lowest total cost of ownership for longterm investments in IT equipment.

To learn more about JLT and their solutions for the food supply chain, please go to the JLT website at www.jltmobile.com or visit the company at Booth S3074 during [ProMat](#) in Chicago from 3-6 April 2017.

About JLT Mobile Computers

JLT Mobile Computers is a leading developer of rugged mobile computers for demanding environments. These PC-type computers are developed and manufactured in Sweden for professional use and are characterized by very high reliability in the face of moisture, dust, vibration, electromagnetic fields or extreme temperature – reliability that is required for use in areas such as transportation, warehousing / logistics, forestry, mining, automation, military and rescue vehicles. JLT operates globally with offices in Sweden and the US, complemented by a network of sales partners that provide complete solutions and local support. JLT has delivered over 90,000 PCs since its inception and the company’s turnover in 2015 was SEK 81 million. The headquarters in Växjö, Sweden houses the development, service and administration departments. The company was founded in 1994 and since 2002 has been listed on the NASDAQ OMX, First North, under the symbol JLT by Remium as Certified Advisor.
