

Press Release September 15, 2011

## **JLT extends its warranty to three years**

**JLT Mobile Computers, a developer of rugged computing solutions for the toughest environments, is now extending its warranty from one to three years on all its products. The extended warranty is the next step in JLT's ongoing commitment to quality and is valid on products purchased from today.**

JLT is relentlessly working on improving the quality and have since 2010 made several investments in this area. The results are in, and as a next step the company now launches the extended warranty to its customers.

– We carefully track all the warranty and service requests that are coming in to learn and to continuously improve our products. Based on the results we've seen, we feel very comfortable with offering a three-year warranty to our customers, says Peter Börjesson, Service Manager at JLT Mobile Computers.

– I frequently travel to visit our sales partners and it is reassuring to get their confirmation on why customers choose JLT. On my question I got different variations on the same answer - because your computers just work, says Per Holmberg, CEO of JLT Mobile Computers.

– To extend the warranty period is therefore a natural step in our ongoing quality work. It benefits our customers and reinforces the confidence we have in the quality of our products, Per Holmberg continues.

The new guarantee agreement can be downloaded at the JLT Mobile Computers website ([www.jltmobile.com](http://www.jltmobile.com)).
