JLT Mobile Computers Introduces Leading Performance and Ruggedness in New Vehicle Computer

JLT Mobile Computers, developer of reliable computers for demanding environments, today announced the VERSO-series – new fixed-mounted computers that combine leading-edge performance with the highest reliability for tough environments. Equipped with Intel Core i7 processors the new VERSO 12 and VERSO 15 computers fulfill a growing need for demanding applications in environments that are often characterized by dust, moisture, vibrations, cold, and heat. As with all JLT computers, the VERSO computers can be used in many various fields, but are specifically developed for the heavy-duty segment, such as mining and construction machinery, off-shore and harbor applications, and agricultural equipment.

Since its start, JLT has shipped more than 80,000 vehicle computers. The VERSO computers are the latest development of JLT's successful PC platform of computers that are able to handle extreme environments. Their reliability has been proven through many years of global field operations. All critical functions are integrated in the VERSO computers, which makes installation of the computers in a vehicle both quick and easy. The JLT VERSO series gives customers access to leading-edge performance in a very rugged and reliable computer.

Leading-edge performance

Equipped with a powerful Intel Core i7 processor and 64-bit Windows 7 operating system, the VERSO computers can be used for such functions as video monitoring, positioning calculations, presentation of complex data, and much else. The VERSO computers are also available with an Intel Dual Core Atom D2550 processor and are ready for Windows 8.

The computers are designed to withstand the harshest environments. They are dust and water proof to the IP65 specification, features a 12" or 15" LED display that is readable in direct sunlight. The standard models can be used in cold storage rooms as well as in broiling hot sun, and with a built-in DC/DC power supply and backup battery the computers handles voltage variations and interruptions without stoppages. The computers also features integrated WiFi 802.11 a/b/g/n, 3G, and Bluetooth communication to ensure a reliable connection.

“We increasingly encounter customers who use computers in tough environments and who require high processing power for demanding applications,” said JLT CEO Per Holmberg. “With the VERSO series, JLT fulfills these increasing demands by integrating the latest processor technology in a well-tested, rugged computer platform.”

Available now

After evaluation and testing for several months by customers within the fields of mining, construction, and offshore, the first VERSO computers are in production and available now. The VERSO computers can be ordered from JLT resellers today.

As with all JLT computers, the VERSO computers can be purchased with a service agreement, JLT:Care. A JLT:Care agreement gives customers a guaranteed service level at a pre-determined cost for up to five years.

About JLT Mobile Computers

JLT Mobile Computers is a leading developer of reliable mobile computers for demanding environments. These PC-type computers are developed and manufactured in Sweden for professional use and are characterized by very high reliability in the face of moisture, dust, vibration, electromagnetic fields or extreme temperature – reliability that is required for use in areas such as transportation, warehousing / logistics, forestry, mining , automation, military and rescue vehicles. JLT operates globally with sales partners, primarily in Europe and the United States, and has delivered over 80,000 PCs. JLT's turnover in 2011 was SEK 125 million. They have approximately 20 employees in Sweden. The headquarters houses the development, service and administration departments and is located in Växjö. The company was founded in 1994 and since 2002 has been listed on the NASDAQ OMX, First North, under the symbol JLT by Remium as Certified Advisor.
